Support K-12 Computer Science Education in Ohio

Computer science drives job growth and innovation throughout our economy and society. Computing occupations are the number 1 source of all new wages in the U.S. and make up over half of all projected new jobs in STEM fields, making Computer Science one of the most in-demand college degrees. And computing is used all around us and in virtually every field. It’s foundational knowledge that all students need. But computer science is marginalized throughout education. Only 45% of U.S. high schools teach any computer science courses and only 11% of bachelor’s degrees are in Computer Science. We need to improve access for all students, including groups who have traditionally been underrepresented.

Computer science in Ohio

- Ohio currently has 21,864 open computing jobs (2.7 times the average demand rate in Ohio).
- The average salary for a computing occupation in OH is $86,642, which is significantly higher than the average salary in the state ($48,220). The existing open jobs alone represent a $1,894,332,775 opportunity in terms of annual salaries.
- Ohio had only 1,584 bachelor’s degrees in Computer Science in 2018; only 17% were female.
- Only 3,504 exams were taken in AP Computer Science by high school students in Ohio in 2019 (1,313 took AP CS A and 2,191 took AP CSP).
- Only 26% were female (22% for AP CS A and 29% for AP CSP); only 159 exams were taken by Hispanic or Latino students (44 took AP CS A and 115 took AP CSP); only 261 exams were taken by Black students (62 took AP CS A and 199 took AP CSP); only 1 exam was taken by American Indian or Alaska Native students (0 took AP CS A and 1 took AP CSP); only 5 exams were taken by Native Hawaiian or Pacific Islander students (2 took AP CS A and 3 took AP CSP).
- Only 178 schools in OH (24% of OH schools with AP programs) offered an AP Computer Science course in 2018-2019 (13% offered AP CS A and 17% offered AP CSP), which is 37 more than the previous year.
- Universities in Ohio did not graduate a single new teacher prepared to teach computer science in 2017.
- According to a representative survey from Google/Gallup, school administrators in OH support expanding computer science education opportunities: 65% of principals surveyed think CS is just as or more important than required core classes.
What can you do to support K-12 CS education in Ohio?

- Send a letter:
  - To your school/district asking them to expand computer science offerings at every grade level: [www.code.org/promote/letter](http://www.code.org/promote/letter)
  - To your elected officials asking them to support computer science education policy in Ohio: [www.votervoice.net/Code/campaigns/58463/respond](http://www.votervoice.net/Code/campaigns/58463/respond)
- Find out if your school teaches computer science or submit information about your school’s offerings at [www.code.org/yourschool](http://www.code.org/yourschool).
- Visit [www.code.org/educate/3rdparty](http://www.code.org/educate/3rdparty) to find out about courses and curriculum from a variety of providers, including Code.org.

Who can you connect with locally to talk about K-12 CS education policy?

- You can reach Code.org’s policy contact for your state, Katie Hendrickson, at katie@code.org.
- The Expanding Computing Education Pathways (ECEP) Alliance ([www.ecepalliance.org](http://www.ecepalliance.org)), an NSF funded Broadening Participation in Computing Alliance, seeks to increase the number and diversity of students in computing and computing-intensive degrees by promoting state-level computer science education reform. ECEP supports 22 states and the territory of Puerto Rico to develop effective and replicable interventions to broaden participation in computing and to create state-level infrastructure to foster equitable computing education policies. You can reach your ECEP point of contact Debbie K Jackson at d.jackson1@csuohio.edu.

Code.org’s impact in Ohio

- In Ohio, Code.org’s curriculum is used in
  - 16% of elementary schools
  - 18% of middle schools
  - 18% of high schools
- There are 16,305 teacher accounts and 950,260 student accounts on Code.org in Ohio.
- Of students in Ohio using Code.org curriculum last school year,
  - 36% attend high needs schools
  - 32% are in rural schools
  - 45% are female students
  - 31% are underrepresented minority students (Black/African American, Hispanic/Latino, American Indian, or Hawaiian)
- Code.org, its regional partner(s) Battelle Education, and 11 facilitators have provided professional learning in Ohio for
  - 1,878 teachers in CS Fundamentals (K-5)
  - 142 teachers in Exploring Computer Science or Computer Science Discoveries
  - 97 teachers in Computer Science Principles

“Computer Science is a liberal art: it’s something that everybody should be exposed to and everyone should have a mastery of to some extent.”

— Steve Jobs
What can your state do to improve computer science education?

States and local school districts need to adopt a broad policy framework to provide all students with access to computer science. The following nine recommendations are a menu of best practices that states can choose from to support and expand computer science. Not all states will be in a position to adopt all of the policies. Read more about these 9 policy ideas at https://code.org/files/Making_CS_Fundamental.pdf and see our rubric for describing state policies at http://bit.ly/9policiesrubric.

Ohio has not yet created a state plan for K-12 computer science. A plan that articulates the goals for computer science, strategies for accomplishing the goals, and timelines for carrying out the strategies is important for making computer science a fundamental part of a state’s education system.

Ohio has established K-12 computer science standards.

Ohio has allocated funding for rigorous computer science professional development and course support.

Ohio has clear certification pathways for computer science teachers.

Ohio has established programs at institutions of higher education to offer computer science to preservice teachers.

Ohio has a dedicated computer science position in the state education agency.

Ohio does not yet require that all secondary schools offer computer science. The state can support the expansion of computer science courses by adopting policies that require schools to offer a computer science course based on rigorous standards, with appropriate implementation timelines and allowing for remote and/or in-person courses.

Ohio allows computer science to count for a core graduation requirement. Find out how Ohio allows computer science to count towards graduation at http://bit.ly/9policies.

Ohio does not yet allow computer science to count as a core admission requirement at institutions of higher education. Admission policies that do not include rigorous computer science courses as meeting a core entrance requirement, such as in mathematics or science, discourage students from taking such courses in secondary education. State leaders can work with institutions of higher education to ensure credit and articulation policies align with secondary school graduation requirements.

Follow us!

Join our efforts to give every student in every school the opportunity to learn computer science. Learn more at code.org, or follow us on Facebook and Twitter.

Launched in 2013, Code.org® is a nonprofit dedicated to expanding access to computer science, and increasing participation by women and underrepresented students of color. Our vision is that every student in every school should have the opportunity to learn computer science.

Data is from the Conference Board for job demand, the Bureau of Labor Statistics for state salary and national job projections data, the College Board for AP exam data, the National Center for Education Statistics for university graduate data, the Gallup and Google research study Education Trends in the State of Computer Science in U.S. K-12 Schools for parent demand, the 2018 Computer Science Access Report for schools that offer computer science, and Code.org for its own courses, professional learning programs, and participation data.
