Description: Write a function onscreen?, which takes in a character’s x-coordinate and checks to see if it is safe on the left and on the right.

Contract and Purpose Statement

Every contract has three parts...

_________________ : ____________________________________ -> ________________
function name     domain     range

what does the function do?

Examples

Write some examples for your function in action...

Example: ________________ ( _______________ ) =  ______________________________
function name  input(s)      what the function produces

Example: ________________ ( _______________ ) =  ______________________________
function name  input(s)      what the function produces

Definition

Write the definition, giving variable names to all your input values

Define: ________________ ( _______________ ) =
function name        variables

what the function does with those variables
